

Barchart delivers our proprietary OTC grain prices via OnDemand APIs to power your agriculture products and services

Proprietary OTC Grain Prices

Barchart is the market leader in the management of OTC grain bids for agribusinesses across North America. Our positioning in this marketplace allows us to seamlessly collect data from opaque bilateral markets. For the first time ever, Barchart is making this data available to our customers to power their analytics solutions and trading systems.

Best of all, we are delivering this data to you through our best-in-class enterprise data solution Barchart OnDemand. Finally, you can get the data you need to power your agricultural focused services and solutions through the data platform that you trust.

Enterprise Level Solutions

Our OnDemand platform is built on industry leading technology. Reliability and accuracy are paramount. With our extensive experience we are the market leaders in API data delivery and fully understand our clients' requirements. We have built Barchart OnDemand to be the most reliable cloud-based market data solution on the market.
